

# 1:1 Laptop Charging Locker

## ZIOXI 1:1 Laptop Charging Locker desktop module

The 8 locker compartments are accessed via individual code based digital locks. Each user chooses their own 4 digit code, and enters the code twice to lock the door then once to re-open. The next user repeats the process, so each locker compartment can be used by different people throughout the day. There's a programmable option for single user repeat usage and master codes for if codes are forgotten. Also available with key locks.

The 1:1 Charging Locker has a separate electrical compartment with shelving for storing and plugging in Laptop, Chromebook or Netbook power adapters; so there's no need for users to cart around adapters and cables — ideal for 1:1 mobile device scenarios. Only a short length of power cable is presented into the locker compartment.

The lockers are very compact, stackable and suitable for Laptops and other mobile devices up to 15.6" screen sizes. Please check device dimensions before ordering.

CHLC-11L-08	1:1 Charging Locker for 8 Laptops & Netbooks, power adapter storage and single / multi user code locks	63h x 49w x 53d (cm)
CHLK-11L-08	1:1 Charging Locker for 8 Laptops or Netbooks with power adapter storage and key based locks	63h x 49w x 53d (cm)
